

STEP-BY-STEP PROCESS TO PERFORM AN EFFECTIVE

FOLLOW-UP:

Initial verification:

Before making any calls, make sure the medical records are not already uploaded in the portal:

[https://attorneyportal.us/signin.aspx?](https://attorneyportal.us/signin.aspx?ReturnUrl=%2fappointment%2fDashboard.aspx)

[ReturnUrl=%2fappointment%2fDashboard.aspx](https://attorneyportal.us/signin.aspx?ReturnUrl=%2fappointment%2fDashboard.aspx)

Review notes:

Carefully read previous notes to fully understand the case and stay aligned with prior communications. This helps avoid repetition and ensures continuity

If they say the records were already sent:

Politely ask them to resend the records, explaining that we have not received them yet.

- If they mention the records were just sent, wait until the next day before following up again, as the portal is typically updated at night.

If they say they have not received our request:

- Confirm the fax number.
- Clearly document in the notes which fax number should be used to send the request for future follow-ups.

Important:

Patients cannot go more than 2 days without follow-up. It is everyone's responsibility to ensure consistent and effective tracking on every case.
